EMPLOYMENT AND PAYROLL REPORTS

Following are publications of the Labour Division based upon establishment data in the field of industrial employment, payrolls and hours:

72-001 - Advance Statement on Employment and Average Weekly Wages and Salaries - Monthly - Price \$1.00 per year

(Index numbers of employment and averages of weekly wage and salary statistics for Canada (major industry divisions) and the provinces (industrial composite figures)).

72-002 - Employment and Average Weekly and Salaries - Monthly - Price \$4.00 per year

(Industry and area index numbers of employment and payrolls and averages of weekly wage and salary statistics; comparisons with earlier periods; charts and explanatory material).

72-003 - Man-Hours and Hourly Earnings - Monthly - Price \$4.00 per year

(Industry and area averages of hours per week, hourly and weekly wages, with comparisons from a month and a year earlier, and certain historical comparisons; charts and explanatory material).

72-005 - Estimates of Labour Income - Monthly - Price \$2.00 per year

(Monthly estimates of wages, salaries and supplementary labour income, both unadjusted and seasonally adjusted, for specific industries and regions; with annual totals from 1954).

72-008 - Estimates of Employees by Province and Industry - "Monthly - Price \$2.00 per year"

(Estimates of total numbers of employees, with comparisons with a month and a year earlier).

72-201 - Review of Employment and Average Weekly Wages and Salaries - Annual - Price \$1.50

(Industry and area index numbers of employment and payrolls and average weekly wages and salaries, monthly and annually, over a lengthy period; charts and explanatory material).

72-202 - Review of Man-Hours and Hourly Earnings - Annual - Price \$1.50

(Industry and area averages of hours per week, hourly and weekly wages, monthly and annually, over a lengthy period; charts and explanatory material).

72-204 - Earnings and Hours of Work in Manufacturing - Annual - Final Report - Price 75 cents

(Separate figures of earnings and hours for men and women and for salaried employees and wage-earners in one week in October from 1946 with industrial and area detail; charts and explanatory material. Special data are obtained on a rotational basis in successive years).

72-502 - Labour Income, 1926-58 - Price 75 cents

(A complete record of annual estimates of labour income from 1926, along with monthly figures from 1947; contains explanations of sources, methods and concepts).

72-503 - Estimates of Employees by Province and Industry, 1961-64 - Price 50 cents

(Estimates of total numbers of employees, monthly and annually, for major industrial divisions, Canada and provinces; contains a review of concepts, sources and methods and indicators of sampling variability).

72-504 - Employment Indexes, Average Weekly Wages and Salaries, Average Weekly Hours and Average Hourly Earnings, Monthly and Annual Statistics -- Historical Series, January 1961 - May 1965 -- Volume I - Price \$4.50

(This volume gives statistics revised to the 1960 Standard Industrial Classification and a 1961 time base for index numbers).

Remittances should be in the form of cheque or money order, made payable to the Receiver General of Canada and forwarded to the Publications Distribution, Dominion Bureau of Statistics, Ottawa, or to the Queen's Printer, Hull, P.Q.

1.14. **Arithmetic Progression (AP)**: A sequence of non-zero numbers in which the difference between any term and its preceding term is constant. The constant difference is called the common difference of the AP.

1.15. **Harmonic Progression (HP)**: A sequence of non-zero numbers in which the reciprocals of the terms form an AP.

1.16. **Geometric Progression (GP)**: A sequence of non-zero numbers in which the ratio of any term to its preceding term is constant. The constant ratio is called the common ratio of the GP.

1.17. **Arithmetic Progression (AP)**: A sequence of non-zero numbers in which the difference between any term and its preceding term is constant. The constant difference is called the common difference of the AP.

1.18. **Harmonic Progression (HP)**: A sequence of non-zero numbers in which the reciprocals of the terms form an AP.

1.19. **Geometric Progression (GP)**: A sequence of non-zero numbers in which the ratio of any term to its preceding term is constant. The constant ratio is called the common ratio of the GP.

1.20. **Arithmetic Progression (AP)**: A sequence of non-zero numbers in which the difference between any term and its preceding term is constant. The constant difference is called the common difference of the AP.

1.21. **Harmonic Progression (HP)**: A sequence of non-zero numbers in which the reciprocals of the terms form an AP.

INTRODUCTION

The data in this report are based on the twelve monthly surveys of employment, payrolls, and man-hours, the results of which are published in the monthly D.B.S. publication "Employment and Average Weekly Wages and Salaries" (Catalogue No. 72-002). In arriving at annual averages the data are "weighted" in the sense that annual employment indexes and average weekly wages and salaries figures are calculated using aggregate payrolls and employment data, not by adding together the twelve monthly averages. Explanatory notes at the back of this publication give the industrial coverage of the survey.

Review of Employment and Average Weekly Wages and Salaries

1968

Employment

The industrial composite index of employment (1961=100) at 122.7 in 1968 was slightly higher than the 122.6 recorded in 1967. This rise, the smallest recorded since 1961, resulted from increases in the service-producing sector. As in 1967, employment gains were recorded in all the main industry divisions of this sector with the exception of transportation, communication, and other utilities. All major goods-producing divisions except mining showed decreases in employment from 1967.

Goods-Producing Industries

From 1966 to 1968 employment in manufacturing fell by 1.1 p.c., with slight drops in both 1967 and 1968. The index at 122.1 in 1968 was 0.8 p.c. lower than in 1967. The latter was the first year since 1961 in which a rise was not recorded.

During 1968 decreases in both durables (1.6 p.c.) and non-durables (0.1 p.c.) contributed to the decline in manufacturing. Among the durable goods industries, primary metals and wood products were the only industries which showed slight rises since 1967, 1.0 p.c. and 0.2 p.c., respectively. Furniture and fixtures showed no change from 1967 to 1968, following a 3.0 p.c. decrease during 1967. All other components recorded decreases in employment in 1968. The largest declines occurred in machinery, except electrical (5.8 p.c.), transportation equipment (2.8 p.c.), and metal fabricating (2.6 p.c.). In non-durables decreases were recorded in most industries from 1967 to 1968. Declines ranged from 0.1 p.c. in chemicals and chemical products to 1.8 p.c. in textile products. Miscellaneous manufacturing had the largest increase in employment, 3.6 p.c. In the non-durables component as a whole, there was little change in the employment index from 1966 to 1968.

In construction the index at 119.4 was 2.6 p.c. lower than the 122.6 recorded in 1967. Since 1966, the year in which the index was the highest on record, employment has declined by 7.7 p.c. Both the building and engineering components contributed to the decline in 1968, with the decrease in engineering much larger, 6.4 p.c. as compared to 0.6 p.c.

Mining in 1968 rose by 0.6 p.c. from 109.1 to 109.8. Although the employment index at this level was the highest on record, the 1968 increase over 1967 was the smallest since 1963. This slight rise was mainly the result of a 10.4 p.c. gain in services incidental to mining.

In 1968 the employment index in forestry fell 11.0 p.c. from 102.3 in 1967 to 91.1. This drop is larger than the 3.7 p.c. decrease in 1967, which followed three consecutive years in which increases were recorded.

Service-Producing Industries

In 1968 employment expanded in all service-producing industries with the exception of transportation, communication and other utilities. Decreases of 2.0 p.c. in transportation and 2.1 p.c. in communication resulted in a 1.3 p.c. overall decline in this industry division. This decline was the first following four consecutive years of employment increases. Although increases were recorded in the remaining major industry divisions, these gains with the exception of that in trade, were not as great as occurred during 1967. The 3.1 p.c. increase in service is the smallest since 1962. The 4.3 p.c. rise in finance, insurance and real estate compares with an average annual increase of 4.0 p.c. since 1963. The 1967 to 1968 gain of 2.9 p.c. in trade exceeded the 1.7 p.c. increase from 1966 to 1967, although it is not as large as the annual rises from 1963 to 1966.

Regions

In 1968 all regions except Quebec recorded small increases in employment levels. These gains ranged from 0.1 p.c. in the Atlantic Region and British Columbia to 1.1 p.c. in the Prairie Region. In Ontario the gain of 0.7 p.c. was lower than the rate shown in each of the previous six years. A decrease of 1.4 p.c. in Quebec was the first since 1960. This drop was mainly the result of declines of 18.7 p.c. in forestry and 10.2 p.c. in construction. In the Prairie Region the building component which showed a 13.9 p.c. increase contributed most to the overall 1.1 p.c. rise of the region. During 1968 the Atlantic Region and British Columbia showed little change over 1967. The slight rise in British Columbia was the smallest since 1961. In the Atlantic Region the 0.3 p.c. decrease from 1966 to 1967 offset the 0.1 p.c. gain during 1968, resulting in a 0.3 p.c. decrease from 1966 to 1968.

Average Weekly Wages and Salaries

During 1968 the industrial composite of average weekly wages and salaries rose from \$102.83 to \$109.88 (6.9 p.c.). This gain was larger than the 6.7 p.c. rise from 1966 to 1967. From the period 1962-68 every annual percentage increase has been greater than that of the preceding year. The 1968 figure was approximately 36 p.c. higher than the average of \$80.54 recorded in 1962.

Among the major industrial divisions in 1968 increases ranged from 4.8 p.c. in service to 8.4 p.c. in transportation, communication, and other utilities. Manufacturing, trade, and finance, insurance and real estate showed larger increases in average weekly wages and salaries during 1968 than 1967. The other major industries recorded smaller gains. The durables component showed an 8.1 p.c. increase as compared to 5.8 p.c. during 1967. The 1968 gain (6.7 p.c.) in non-durables was slightly lower than the 1967 rise (7.0 p.c.). Levels of earnings ranged from a high of \$139.16 in mining to a low of \$78.99 in service.

From 1967 to 1968 Ontario and the Prairie Region were the only regions recording increases above the 6.9 p.c. rise of the industrial composite, 7.2 p.c. and 7.8 p.c., respectively. During 1968 gains of 6.5 p.c. in the Atlantic Region and 6.7 p.c. in Quebec were the same as the rises recorded in 1967. The 5.5 p.c. increase in British Columbia was smaller than the 6.6 p.c. gain in 1967. Levels of average weekly wages and salaries ranged from \$90.55 in the Atlantic Region to \$120.76 in British Columbia.

TABLE 1. Summary Statistics of Employment, Payrolls and Average Weekly Wages and Salaries

Industry division and area	Index numbers (1961=100)						Average weekly wages and salaries		
	Employment			Payrolls

NOTES

Each month the Employment Section collects from its reporting units data on the number of paid employees and their payrolls, on the number of wage-earners for whom a record of hours is kept and their hours and earnings, and on the number of female employees. The wage-earner data are published in a monthly report "Man-Hours and Hourly Earnings", Catalogue No. 72-003. The data relate to a reference period, conceptually the last seven days of the month. In a monthly tabulation the data are grouped into industrial and geographic units.

The Reporting Unit

The reporting unit is usually the establishment, that is, the smallest industrial unit which is a separate operating entity capable of reporting all elements of basic industrial statistics including information on inputs and outputs needed to calculate "value added" or "gross mark-up" or "gross profit" as well as the related data on employment and payrolls. For purposes of urban area statistics, the Employment Section may request separate reports from parts of an establishment located in different urban centres.

Monthly reports are requested from establishments in the following industry divisions: forestry; mining, including milling; manufacturing; construction; transportation, communication and other utilities; trade; finance, insurance and real estate; and parts of service.

The survey covers larger firms only, that is, firms having 20 or more employees in any month of the year. Thus all the establishments of a multiple establishment firm are included if the firm had 20 or more employees in total in any month of the year even though any particular establishment may have only a few employees. This size criteria results in approximately the same coverage as did the "usually employing 15 or more" criteria that was formerly used.

Coverage

The limitation of surveys to larger firms results in a large and relatively even coverage of total employment in the surveyed industry divisions in most provinces and urban areas. The industrial representation, though large, is more uneven; the proportion of employees covered depends on the organization of particular industries into larger or smaller establishments.

The table at the end of the notes shows annual employment in the survey as a percentage of the estimated total employment, the latter being estimated by adding together data from the employment and payrolls survey and data from a sample survey of smaller firms. A report on the total employment estimates is published monthly by the Employment Section, "Estimates of Employees by Province and Industry", Catalogue No. 72-008.

Definitions

Reference Period

The figures refer to the last seven days in the specified months. In practice, few establishments keep payroll records covering precisely this period and establishments are therefore permitted to report for their last pay period or pay periods in each month.

When the reported pay period is longer than one week, the payroll data are reduced to one week's proportion of the totals. The numerators of the fractions used in calculating these weekly equivalents are 5, 6 or 7 depending on the number of working days per week in which the establishment operated in the pay period. The denominators of the fractions are the number of working days in the different pay periods. For employees paid at annual or monthly rates, whose earnings are not affected by the number of working days in the month, fixed proportions are used to reduce the earnings to a weekly basis, without regard to the length of the calendar month. When a holiday, layoff or industrial dispute occurs in an establishment that reports a pay period that is different from the last week of the month, an adjustment is made to the data if the holiday, layoff or dispute affects the two periods differently.

The use of the last pay period in the month reduces double counting of individuals who work for more than one establishment in a period of several weeks. The Quebec forestry industry is an exception in that the turnover of wood workers paid on a monthly basis is high. Consequently this group reports on a special questionnaire which has an additional question on the average number of employees in the last week of the month.

Employment

The survey covers all wage-earners and salaried employees of reporting establishments who are paid for rendering current services or are on paid absence during the reference period except for casual employees working less than the equivalent of one full day in the pay period. Regular part-time employees are included. The employee concept excludes proprietors, directors and firms members including those who are actively engaged in the operation of the firm, pensioners, home-workers and persons providing services to an establishment on the basis of a contract for services.

Employees not receiving pay for any time during the reference period are excluded. For example, workers on strike during the reported pay period, or laid off as a consequence of a strike, are not included in the data unless they work part of the week or draw pay from their employers (e.g., unless they take paid vacations during the dispute). The exclusion of persons affected by industrial dispute is one of the main sources of irregular fluctuation in the series.

Average Weekly Wages and Salaries

The wages and salaries are derived from payrolls which include gross payments before deductions are made for taxes, unemployment insurance, etc. Included are salaries, straight-time wages, over-time wages, cost-of-living allowances, commissions, payments to persons absent because of holidays, vacations, sickness, etc., and regularly paid incentive, production and shift bonuses.

The payroll concept does not include supplementary labour costs, operational costs or payments not related to the reference period. Thus the data do not include such items as employer's contributions to unemployment insurance, medical plans, workmen's compensation, other welfare plans, the value of room and board, compensation in kind, travelling expenses, retirement gratuities, or bonuses paid at irregular or infrequent intervals. The treatment of vacation stamps is an exception. Although payment of vacation stamps does not relate to the reference period, these payments are included in the payroll data and the employees are considered to be absent without pay during the period they are on vacation.

Organization of Data

The Tabulation

Data tabulated for publication each month show the numbers of women, the number of employees of both sexes and weekly payrolls for the current and preceding month. The statistics first published for each month are preliminary; re-tabulation of the data in the succeeding month permits incorporation of corrections, retroactive pay for one month and data received too late for inclusion in the first tabulation. Data tabulated but not published are available on request provided the secrecy requirements of the Statistics Act are met.

The data are classified by industrial and geographic units and various averages, aggregates and index numbers are calculated.

Industrial Classification

All reporting establishments are assigned to an industrial class on the basis of their principal activity. If an establishment is engaged in a number of different industrial activities, its principal activity is determined by the net value added by these activities, or, where this is not possible, by the gross revenue obtained from the different activities. When an establishment has very mixed activities, it is not necessarily shifted from industry to industry each time its principal activity changes.

A description of the various industries and groups of industries may be found in the "Standard Industrial Classification Manual," DBS Catalogue No. 12-501. The "SIC code" columns in the main tables refer to this manual. The tables contain a few groups not found in the S.I.C. These includes:

Industrial composite - The sum of the industries tabulated

Durable goods manufacturing - The sum of wood products, furniture and fixtures, primary metal industries, metal fabricating industries, machinery (except electrical), transportation equipment, electrical products, and non-metallic mineral products

Non-durable goods manufacturing - The sum of the remaining manufacturing industries

Building - The sum of general contractors and special trade contractors

Engineering - The sum of highways, bridges and streets and other construction

As well, the tables subdivide the synthetic textile industry into filament yarn and staple fibres, and spun yarn and fabrics.

Geographic Classification

Reporting establishments are assigned to a province and, where applicable, to an urban area. Newfoundland, Prince Edward Island, Nova Scotia and New Brunswick are added together in some tables to give a figure for the Atlantic Region. Similarly Manitoba, Saskatchewan and Alberta are added together to give a figure for the Prairie Region. Establishments in the Yukon and Northwest Territories are excluded from provincial totals but are included in the Canada totals. For urban areas the Census of Population's "Metropolitan Area" definitions were used for the seventeen urban areas where they apply. The definitions used for other urban areas were based on a labour market concept; they usually include a main centre and surrounding territory. A list outlining the territory included in each of the tabulated urban areas is available from the Employment Section on request.

An establishment not located in a tabulated urban area or an establishment that has no fixed location such as certain transportation and construction establishments, is included in the provincial totals but is not assigned to an urban centre.

Index Numbers

Index numbers are calculated by dividing the current month's employment by one-twelfth of the total base period employment. The current employment consists of all employment in establishments that meet our size criteria in the current period. Base year employment consists of the employment of establishments that had 20 or more persons in any month of 1961.

Seasonally-adjusted index numbers remove from the employment indexes these regularly recurring fluctuations known as "seasonal variations". The adjusted index numbers thus approximate the trend, cycle, and irregular components of the time series. A variant of the Census Method II is used to calculate the seasonally-adjusted index numbers.

Other Calculations

The average weekly wages and salaries figures are obtained by dividing weekly payrolls by the number of paid employees, including part-time employees and casuals working more than the equivalent of one day a week. Annual statistics are calculated from the aggregate of the monthly data, not from monthly averages. The industrial composite figure for a given geographic unit is the aggregate of all data tabulated for that area.

Larger Firm Employment as a Percentage of Total Estimated Employment, by Industry Division,
for Canada and Provinces, 1968 Annual Averages(1)
